Hello Misha Vakoc,

I would like an extension to the comment period about the PFAFs found in Dugualla Bay. I am concerned about my well and the community well my father is on. How do we get those tested? This is so frightening, the contamination levels, the fact that the PFAFs are getting into the aquifer, and the fact that the Navy has not been providing ALL of the test information. Apparently the Navy did the same thing with the wells in Coupeville by not disclosing all the test results. They chose to omit information. OUTRAGEOUS!!!!
